YOUR TECHNOLOGY LEADER IN COMMERCIAL-SCALE ASPHALT MAINTENANCE

From the moment one of our representatives picks up the phone to the time the parking lot opens, AddAline provides a level of service and technical precision that sets us apart.

The only company that operates on Saturdays and in the off-season when asphalt plants are closed, AddAline offers personal attention and unparalleled work with a simple philosophy: **ideal preventative maintenance comes from doing the job right the first time.**

By combining highly trained, experienced professionals with industry leading technologies and an approach that respects client timelines and the most sensitive questions, AddAline offers you that peace — and light.

And it's not just talk. With a warranty that is 100 percent longer than the next best in the business, we have built a reputation for providing technical what we do best.

WESTERN RESEARCH PARK

The 50-acre Western University Research Park was established in 1989. For nearly three decades, Western Research Park has served as a strong link between academics and commerce and a key contributor to the movement of an idea or a discovery from concept to the marketplace.

The Park is located adjacent to Western University and is home to over 200,000 square feet of office space, lab space and industrial grade space including the Stiller Centre for Technology Commercialization and one of Canada's most successful biotechnology incubators. Tenants at the Research Park range from regional government laboratories, to large multi-national research centers, to start-up Canada's fastest growing emerging companies.

The Research Park is also home to the Western Manor, a 400,000 sq. ft. multi-use and conference centre which hosts tens of thousands of visitors every year.

Using a blend of quality facilities, exceptional client services and strong collaborative partners, Western Research Park has and will continue to provide a unique environment for supporting knowledge based companies and achieving their research goals to improve our lives and the world around us.

THE STILLER CENTRE FOR TECHNOLOGY COMMERCIALIZATION

Leading Stiller Centre for Technology Commercialization has established itself as one of Canada's leading technology incubators, with advisory focus on commercializing "wet science," laboratory based ventures. "Wet science" refers to a broad array of business applications including drug development, medical devices and imaging, cellular therapy, alternative energy, chemical processing and more.

The Stiller Centre provides a start-up friendly environment for the launch and early development of technology based companies. In 2010, the Stiller Centre was named the Canadian Technology Incubator of the Year by the Canadian Association of Business Incubation.

Founded
1989
